

There are laws, in theory, that protect the U.S. people from the unjust practices of monopolies and oligopolies. What I desire to see is organizations such as the FCC which, by the way are government run, to take public good into consideration for a change. By allowing fewer and fewer companies to control our airwaves all of the diverse points of view will not be heard. In allowing a thing like this to happen not only are the airwaves being monopolized but are thoughts are as well. Media consolidation is not a move oward the better but rather a move toward oppression and repression. Pleas keep the current laws in tact and do not allow for more media consolidation and do this for to encourage democracy and all that we as a nation claim to stand for.
